Hello Gary,

I did not get Michelle's contact information and if you could provide that to me I would very much appreciate it.

EPA will likely begin demobilization from the event after the 1830 update. I may not be attending but I will have one of my contractors attend and provide me with an update. Going forward, I would appreciate the following:

1. Daily email on the status of incident activities including air monitoring activities (near response activities, perimeter, and community) beginning the end of day on 8/2/19 and ongoing until the all clear is determined, and,
2. Copies of subsequent STEERS Reports (30-day Report).

It is also important to know that EPA will not always play a hands-off role in a response as that is based upon the perceived seriousness of the event based upon the EPA OSC determination. Typically, EPA, TCEQ, and Local (Harris County/Baytown) will be unified incident commanders working alongside your incident commander. Generally, we will not make decisions relative to firefighting efforts as we typically like to leave those decisions to the fire experts but certainly will relative to environmental and cleanup issues.

Thank you for you hospitality,

Gary W. Moore (6SF-ER)
